PROFESSIONAL EXPERIENCE

Flipkart

Assistant Manager - Business Analyst

Bangalore, India (On-Site)

Dec 2025 - Present

- Built the Large Appliances **forecasting workflow** and automated **bottom-up vs. top-down reconciliation** across categories and verticals; monthly closure moved from **mid-month to week one**, leaving more time for category analysis.
- Fixed the Amazon - Flipkart **SKU mapping** used in **CIPi competitive-pricing reports**, clearing unmapped top sellers and stale listings so category teams could make pricing calls on more reliable competitor comparisons.
- Built **price-elasticity models** on the corrected pricing base and track **return per cash burn and burn-to-GMV** across categories and events; the resulting discount reallocation contributed to **~3% higher category margin** and **~8% better target achievement**.
- Own monthly forecasting across **8 super-categories** and their verticals, combining **YoY/CAGR trends** with the event calendar to estimate GMV, ASP, traffic and inventory at category and sub-category level.
- Translate **GMV targets into operating inputs** by linking ASP, conversion and inventory drivers - estimating sourcing units, warehouse capacity with a 5% buffer, and channel-level traffic requirements.
- Maintain separate **realistic and target scenarios** so category teams can work with unbiased forecasts while leadership commitments stay visible; track both views weekly against actuals to flag gaps early.

Swiggy

Data Analyst

Bangalore, India (On-Site)

Sep 2024 - Dec 2025

- Owned **weekly business performance for SNACC** across traffic, conversion, availability, demand and wastage; prepared RCAs and drove **WBR and Monthly Operating Plan (MOP)** reviews with leadership and cross-functional teams.
- Benchmarked SNACC against **Bistro, Zepto and Swish** across pricing, assortment, availability and storefront experience; surfaced competitive gaps in WBR/MOP reviews and translated them into actions for Category, Product and Supply teams.
- Analysed **20+ product experiments** across search, category and cart journeys; moving the Buy Again rail for repeat users emerged as a key win, improving **order conversion by ~4%**.
- Ran **cohort and retention analysis across 12M+ users** and identified **D14 second-order behaviour** as a strong LTV signal; the insight shaped a D+7 CRM trigger that improved **D30 retention by ~5%**.
- Owned **item-availability analytics and RCAs** across products and restaurants, using live menu data and SQL to identify stock-out and assortment gaps; actions with Supply and Category teams improved **item availability by 13%**.
- Built **live sales-versus-forecast tracking** around order trends, inventory and shelf life to flag slow-moving items early; the view supported markdown and menu decisions and helped **reduce food wastage by 8% MoM**.
- Automated the **end-to-end vendor PO workflow** across generation, upload and reconciliation using **Python/Selenium and APIs**, cutting manual effort **from 8+ hours to ~1 hour per day** while maintaining accurate, on-time ordering.

PROJECTS

PetApex - India-first Pet Services Marketplace

- Defined **product strategy and MVP scope** through persona research, competitive/service-flow analysis and journey mapping; prioritised core booking and payment journeys over rewards and translated the scope into **PRDs and wireframes**.
- Designed the **multi-sided marketplace experience** for pet parents, providers, staff and admins, covering provider discovery, service configuration, availability, bookings, staff assignment, cancellations, reviews and provider operations.
- Reworked the end-to-end booking journey into a **cart and single-checkout experience** with per-service slots, provider-level pricing and one payment creating multiple bookings, simplifying a previously fragmented user flow.
- Built the **product analytics and experimentation foundation** across acquisition, activation, retention and revenue, defining **KPIs and event taxonomy** for funnel analysis, cohort tracking, feature adoption and future experiments.
- Took the MVP from product specification to working implementation, shipping **OTP auth, INR pricing, UPI/card checkout**, provider KYC/onboarding and an operations portal on **Next.js, Node.js and PostgreSQL** with feature-flagged rollout.

TECHNICAL SKILLS

- SQL & Data:** Advanced SQL (CTEs, Window Functions, Joins, Aggregations, Subqueries, Query Optimization), Hive, PySpark, Snowflake, BigQuery, Databricks, Google Cloud Platform, Jupyter, Google Colab
- Programming & Automation:** Python (Pandas, NumPy, Scikit-learn, statsmodels), Apps Script, Selenium, API Automation
- Analytics:** Product Analytics, A/B & Multivariate Testing, Funnel & Conversion Analysis, Cohort & Retention Analysis, LTV Modeling, Segmentation & Targeting, Regression, Forecasting, Anomaly Detection, Root Cause Analysis, KPI & Metric Definition, EDA
- BI & Product Tracking:** Power BI, Tableau, Advanced Excel, Google Sheets, Amplitude, Mixpanel, Google Analytics, Feature Adoption & Usage Tracking, Self-Serve Dashboards
- Product & Collaboration:** PRDs, User Journey Mapping, Wireframing, Prototyping, Requirements Gathering, Stakeholder Management, Data Storytelling, Jira, Confluence, Notion, Figma
- AI & Development:** Claude, Codex, Cursor, Copilot, Prompt Engineering, LLM-Augmented Analytics, AI-Assisted Workflow Automation

EDUCATION

Delhi Technological University (formerly DCE)

Bachelor of Technology (B.Tech), Civil Engineering

New Delhi, India

2019 - 2023
